

To Whom It May Concern:

I think it's a travesty of justice for the Government to waste my tax dollars for a feature that I gladly pay for and is neither illegal, immoral, or a threat to National Security. Like so many other Americans, I commute back and forth to work and rely on up to date road and weather conditions. This is one of the selling points of why I wanted XM Radio.

I bought and paid for this service by my own free will. Consequently, I want this service available to me 24/7. Please don't tread on one of the few liberty's that I can enjoy without worrying about hurting my fellow man.

Thank You.
